

EQUIPMENT MANAGER

DESCRIPTION

Equipment managers play an essential role in the construction industry. You will be responsible for planning, coordinating and directing the operations of all equipment. They organize and execute the repair schedules of equipment. Equipment managers ensure safety practice and policies for operating the equipment both on and off a job site.

SKILLS

- Effectively manage a team
- Ability to be able to multi-task and be comfortable working in a fast-paced environment
- Manage materials, equipment and tools
- Ability to effectively problem solve
- Working knowledge of mechanics
- Thrive in team dynamics, leadership ability required

DUTIES

- Check and inspect equipment to ensure they meet construction project requirements
- Test and check electrical parts and wiring for proper connections
- Adjust equipment and repair or replace defective parts, components or systems
- Analyze the equipment to decide whether equipment should be removed or repaired
- Diagnose malfunctions using computerized and other testing equipment

EDUCATION

- **Completion of high school is required**
- Qualification as a heavy equipment mechanic is usually required
- Experience with equipment maintenance and repair is usually required

GETTING STARTED

THE OCCA CAN HELP YOU EXPLORE THESE THREE PATHWAYS:

- 1** You can begin by applying for a job directly in the Construction Industry. Once you begin working with a Construction Company or Contractor you will quickly gain the necessary skills needed to advance yourself through in-house, work-as-you-learn training.
- 2** You can get started through an apprenticeship program by combining on the job training with technical in-class training, gaining experience and increased responsibility. You can work in the industry, get paid, and work towards earning credits .
- 3** You can enroll in a University, Community College or a Private Technical School to study and prepare yourself for a Career in Construction. All of this information may be found through our website.
