

# HVAC INSTALLER

## DESCRIPTION

HVAC workers are necessary and essential for ensuring building functions and maintaining the safety, sanitation, and essential operation of residences. They replace air conditioning, heating, and refrigeration equipment as needed, as well as test connections for leakage and pressure problems.

## SKILLS

- Installation and troubleshooting skills for heating and cooling systems
- Finding and fixing the source of a problem
- Finding or altering replacement parts
- Installing individual parts (pumps, pipes, fans, etc.) Using power tools safely

## DUTIES

- Repair and rebuild complex commercial HVAC and environmental systems, touring and inspecting regularly
- Calibrate thermostats and ensure appropriate temperatures are maintained
- Oversee outside contractors and HVAC technicians to ensure timely service and performance
- Troubleshoot and repair HVAC/R equipment
- Apply local HVAC codes in a practical manner on each job
- Provide excellent customer service
- Provide technical support in the field

## GETTING STARTED

### THE OCCA CAN HELP YOU EXPLORE THESE THREE PATHWAYS:

1

You can begin by applying for a job directly in the Construction Industry. Once you begin working with a Construction Company or Contractor you will quickly gain the necessary skills needed to advance yourself through in-house, work-as-you-learn training.

2

You can get started through an apprenticeship program by combining on the job training with technical in-class training, gaining experience and increased responsibility. You can work in the industry, get paid, and work towards earning credits .

3

You can enroll in a University, Community College or a Private Technical School to study and prepare yourself for a Career in Construction. All of this information may be found through our website.
